EDUCATION

Pune Institute of Computer Technology (PICT) **2023 – 2027**
Bachelor of Engineering (B.E.) - Electronics and Telecommunication Engineering *Pune, Maharashtra*

EXPERIENCE

Technosys Consulting Pvt. Ltd. **December 2025 - March 2026**
Role - Data Analytics & Software Development Intern *Pune, Maharashtra*

- Processed and structured complex datasets using **Python, Pandas, NumPy** and optimized **SQL/PostgreSQL** queries, migrating unstructured data into high-performance relational database systems and automating reporting workflows.
- Developed Python automation scripts and lightweight **REST API** endpoints for backend data pipeline integration, reducing manual processing and streamlining internal workflows.
- Designed dynamic dashboards using **Power BI and Advanced Excel** to analyze operational trends and support data-driven decisions for client-facing enterprise software integrations.

IEC Chhatrapati Sambhajinagar **September 2025 - November 2025**
Role - Full Stack Developer Intern *Chhatrapati Sambhajinagar, Maharashtra*

- Architected and developed a responsive full-stack web application using **ReactJS, Node.js, Bootstrap and MySQL**, covering frontend, backend, deployment and production maintenance.
- Implemented secure lead-capture functionality and an admin content management system using **REST APIs**, input validation and access-control practices for student and university inquiries.
- Used **Claude and Cursor AI** for code auditing, refactoring and basic security validation while supporting continuous feature development and platform improvements.

PROJECTS

PulseSentinel – Uptime Monitoring Platform | Node.js, Express.js, MySQL, React, REST APIs

- Built a full-stack **uptime monitoring platform** with a Node.js/Express **REST API**, a **MySQL** schema (foreign keys, indexes) and a React dashboard showing monitor status, response times, uptime percentages and incident history.
- Implemented a **background scheduler** running HTTP/HTTPS checks at per-monitor intervals without duplicate or overlapping jobs, and an **incident engine** that opens incidents on healthy-to-unhealthy transitions and resolves them on recovery.
- Prevented **SSRF** using DNS resolution and private/loopback IP validation, with redirect and timeout controls, parameterized SQL and input validation; wrote **automated tests** for URL validation, checks and incident logic.

ShortLink – URL Shortener with Click Analytics | Python, FastAPI, PostgreSQL, Docker, REST APIs, Pytest

- Built a **URL shortener REST API** using Python and FastAPI that validates input URLs, generates unique **Base62 short codes** and redirects visitors to the original link.
- Designed a **PostgreSQL** schema with foreign keys and indexes to log every click (timestamp, referrer) and exposed analytics endpoints for total and daily clicks per link.
- Added **JWT authentication** so users manage only their own links, wrote **Pytest** unit and API tests, and containerized the application with **Docker**.

DealDrop – E-commerce Price Tracker | Next.js, Node.js, Web Scraping, Vercel, AWS

- Developed an end-to-end **web scraping pipeline** using Next.js and Node.js to monitor live product pricing across multiple e-commerce platforms and process historical price trends.
- Implemented **asynchronous notification alerts** triggered by user-defined price thresholds and deployed the production application using **Vercel/AWS**.
- Engineered automated scheduling jobs for continuous price polling and historical data logging.

TECHNICAL SKILLS

Programming Languages: C++, Python, Java, JavaScript, TypeScript, SQL
Frameworks & Libraries: ReactJS, Node.js, Express.js, Next.js, FastAPI, Pandas, NumPy
Databases & Cloud: MySQL, PostgreSQL, MongoDB, AWS, GCP, Vercel
Developer Tools: Git, GitHub, Docker, REST APIs, Pytest, Power BI, Jupyter Notebook, Web Scraping
Concepts: Concepts: Software Engineering Principles, Data Structures & Algorithms, OOP, Problem Solving, Unit Testing, Backend Development, Database Management

ACADEMIC & EXTRACURRICULAR ACHIEVEMENTS

- **INC Domain Coordinator – AI/ML:** Coordinated student teams and engineering architecture reviews for machine learning projects.
- **AWS Cloud Club Member:** Participated in cloud architecture workshops covering databases, serverless computing and web application security.
- **PICT Addiction Cultural Festival:** Managed logistical workflows for 200+ participants.
